Transforming Health

Urinary System

The kidneys and bladder perform the vital role of filtering & removing waste in the form of urine from the body, in the process of maintaining a healthy balance of fluids and electrolytes, which is crucial to many bodily functions.

Health Conditions

- **Urinary Tract Infection:** Infection of the urethra, kidney or bladder. It can cause inflammation and fever.
- **Bladder Control:** Loss of control over the bladder, which can cause urine leakage.
- **Bladder stone:** Build-up of minerals in the bladder that obstructs passing of urine.
- **Kidney stones:** They are hard deposits made of minerals and salts that form inside your kidney.

Holistic Approach

The functionality of urinary system is to remove toxins from our body. There is an indisputable link between our gut and the health of the body. We support active kidney function and urinary health by suggesting a mix of homeopathic remedies, lifestyle changes and diet intake to prevent and correct possible conditions associated with urinary system.

Our units, Holistic and Kaleidoscope, work in collaboration to offer comprehensive programs and customized interventions for chronic lifestyle disorders and emotional wellbeing disruptions.

📍 **Centre Address:**
32-B, Upper Ground Floor,
Main Pusa Road, Old Rajendra Nagar,
New Delhi-110005
